ChatGPT was used to troubleshoot an error that was received when deploying the API, the error was copied and pasted into ChatGPT and ChatGPT provided the solution of editing the user role to allow for the deployment of API on Google App Engine, OpenAI is referenced in the reference section of the ReadMe.

ChatGPT was used to troubleshoot a JSON error that was received when making a call to the API, it provided an optimized code snippet that would allow the JSON to be passed into the Android Application; OpenAI is referenced in the reference section of the ReadMe.

Gemini Chat API was integrated into our Android Application to provide emotional support to the user; it is referenced in the reference section of the ReadMe.
